23. Problem: (use additional Sheets if necessary) The CCR adds a group of recently approved RVARs to the VDB RVAR table. The CCR updates both the VDB L3 Comprehensive Status Report and the Raytheon L3 Verification Status report. The updated Raytheon report is attached for control purposes.						
24. Proposed Solution: (use additional sheets if necessary) Add approved RVARs to the VDB RVAR table: Two sets of RVAR hardcopies are included with this CCR. Update the pre-5A Verification column, the RVAR Status column, the L3 Verified column, the Requirement Status column and the EOC Comment column of the VDB L3 Comprehensive Status report and the Raytheon L3 Verification Status Report per the attached instructions. Add to the Raytheon L3 Verification Status Report an IRDs Linked column per instructions attached.						
25. Alternate Solution: (use additional sheets if necessary)						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary)						
27. Justification for Emergency (If Block 15 is "Emergency"): The routine CCR approval cycle is too long to support EOC L3 verification activities. Implemented CCRs are needed promptly in order to be available as timely input into succeeding steps for completion by EOC.
